

# INNOVATION TECHNOLOGIES AND DIGITAL TRANSFORMATION

## WHO ARE WE ?

Altelios Technology is an expert in the fields of innovation, new technologies and operational safety.

Our employees contribute to the realization of exciting and innovative technological projects to anticipate the evolutions that will make the future.

We are based in France and Europe with our 4 Services Center in Boulogne-Billancourt, Valence, Lille and Brussels.

## INFORMATION TECHNOLOGY CLUSTER

Our employees in the New Information Technologies division contribute to the realization of our customers' technological projects. Our expertise focuses on the following areas:

**THE TRANSFORMATION  
AND DIGITAL INNOVATION**

**CLOUD INFRASTRUCTURES  
AND EXPERTISE**

**THE DEVELOPMENT OF  
BUSINESS APPLICATIONS**

**CYBERSECURITY**

# SKILLS

## DIGITAL TRANSFORMATION AND INNOVATION

Atelios Technology supports you in your industrial and digital transformations. We develop the products and services needed to implement complex and vital architectures.

To support our customers in their digital transformation, we offer:

- Individual or group training and coaching.
- Setting up a backlog, monitoring users stories ... (Product Owner)
- Production management and management of development teams (Tech lead and Dev lead)
- Support in agility (Scrum Master)

## BUSINESS APPLICATION DEVELOPMENT

We support our clients through the entire life-cycle value chain of their project

- Project management, quality, cost and time management
- Design and development of MVP (new product, service or functionality)
- Development engineering (analysis, design and development)
- Development of Front End applications (Angular, JS, HTML5/CSS3, Javascript, Python, etc ..)
- Back End application development (Java, Node, Dot.Net, PHP, Synfonie, etc.)
- Full Stack Development

## CLOUD INFRASTRUCTURE AND EXPERTISE

With its expertise in open source infrastructure technologies, Altelios Technology supports you in your Cloud & DevOps transformation projects.

To take advantage of cloud opportunities and innovations, our services cover the following areas :

- Architectural advice : analysis of the existing situation, organizational plan, development of the action plan, etc.
- Change management : switching from on-enabled to cloud.
- Choice of technologies and partners : private, public and hybrid cloud.
- Integration of DevOps deployment (Ansible, Jenkins, Docker, Kubernetes, etc.)

## CYBER SECURITY

Cyber security has become a major concern for companies. Altelios Technology has chosen to specialize in this environment. Our experts offer you two modes of intervention :

### Audits :

- Intrusion tests (internal and external, physical and logical).
- Exercices in « Red Team » mode.
- Vulnerability, compliance, architecture , code, configuration audits.

### Tip :

- Risk mapping (structural, fonctional, organizational and opérateur) and treatment plan.
- Revision of legal references : IT charter, data confidentiality, regulatory compliance.
- Implementation of an WSIS.
